西醫觀點的疼痛？
(Pain in Western ?)

Q : What is Pain?

“ 一種不愉快的感覺與情緒經驗，
與實際或潛在組織損傷有關，或感覺像是受了傷 ”

(An unpleasant sensory and emotional experience associated with, or resembling that associated with, actual or potential tissue damage)

IASP
International Association for the Study of Pain

“ 疼痛是第五生命徵象 ”

(Pain is the 5th vital sign)

WSAVA
Global Veterinary Community

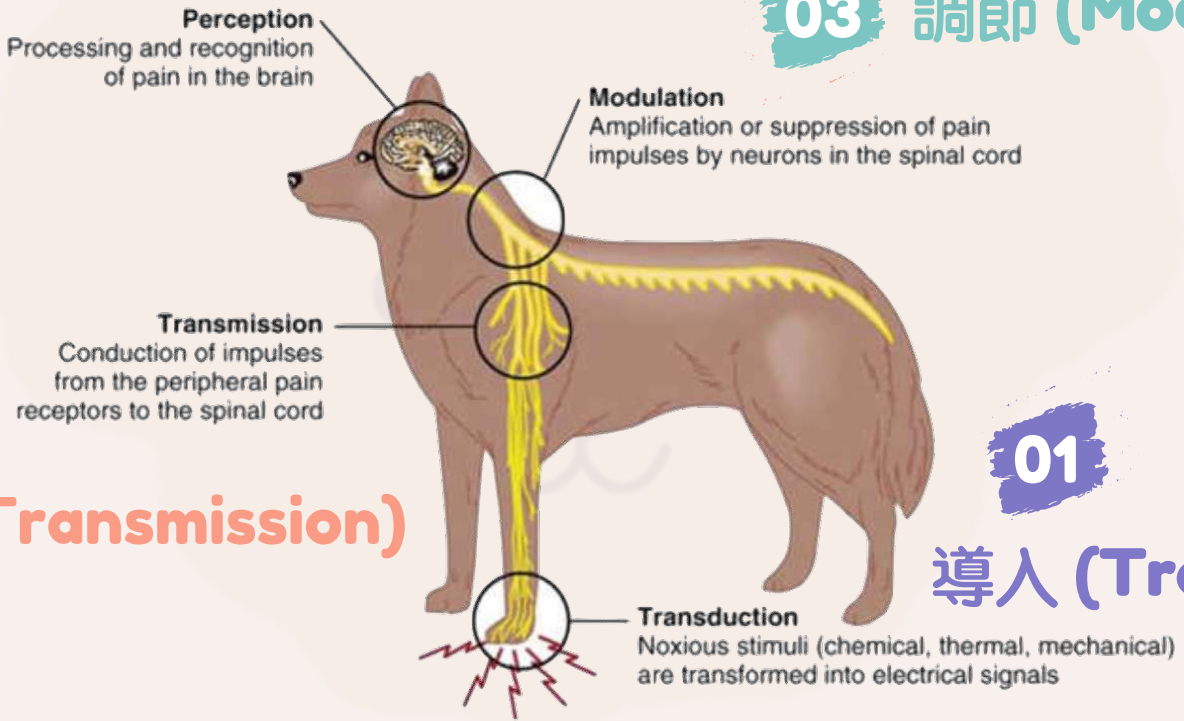

評估疼痛和評估心跳、呼吸、體溫、營養一樣重要

(Assessing pain is as important as heart rate, respiration, temperature and nutrition)

疼痛傳遞路徑 (Nociception Process)

04 認知 (Perception)

03 調節 (Modulation)

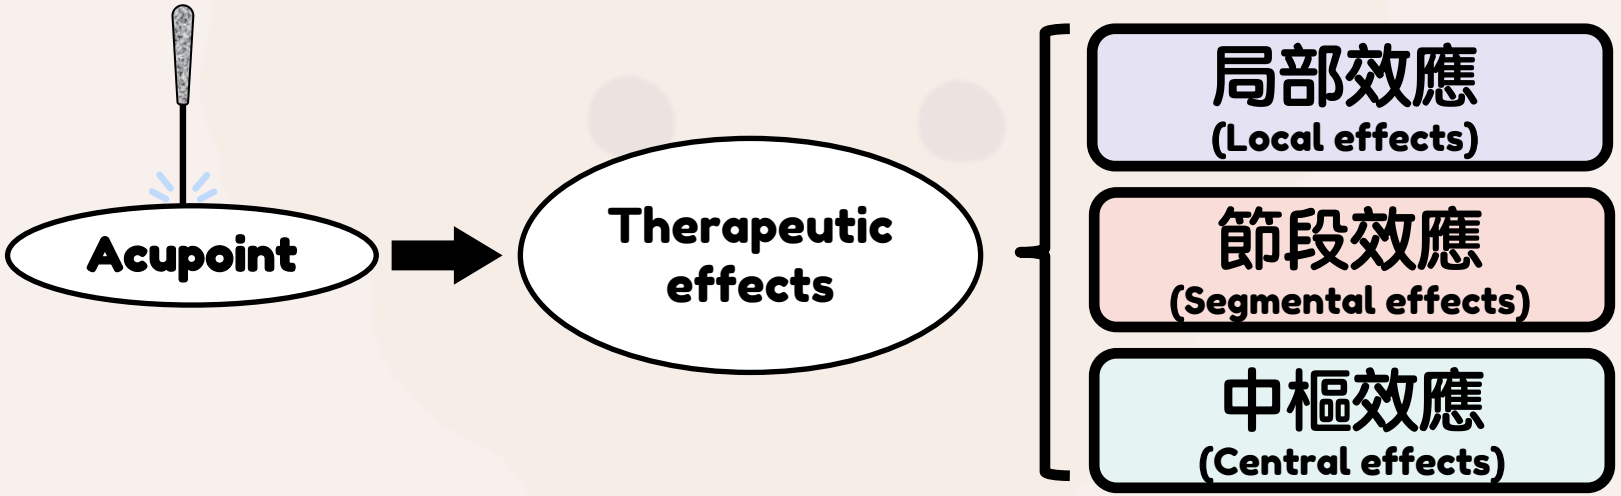

02 傳送 (Transmission)

01 導入 (Transduction)

針灸鎮痛效應 (Acupuncture analgesia)

針灸的現代科學機制

The physiologic effects of acupuncture therapy **cannot be explained by a single mechanism**, but rather a series of interactions

That's Complicated...

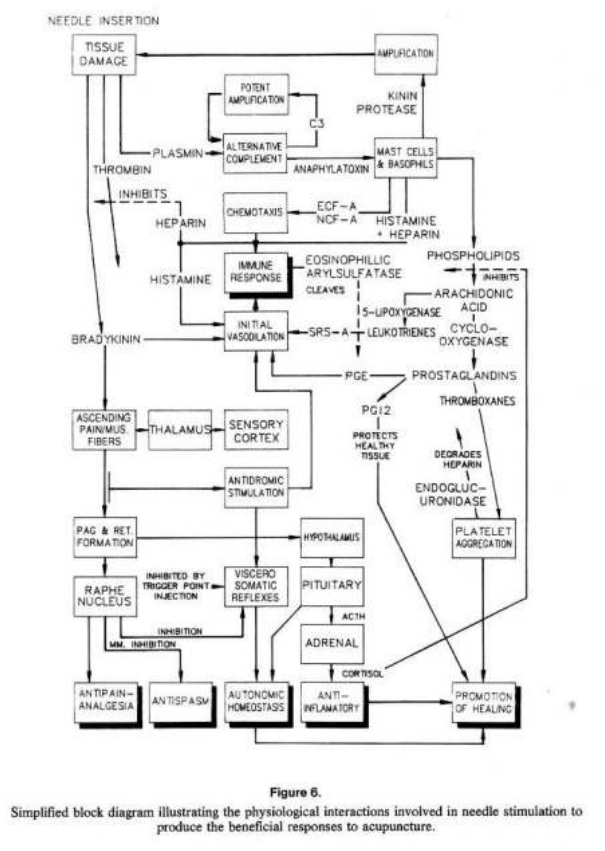

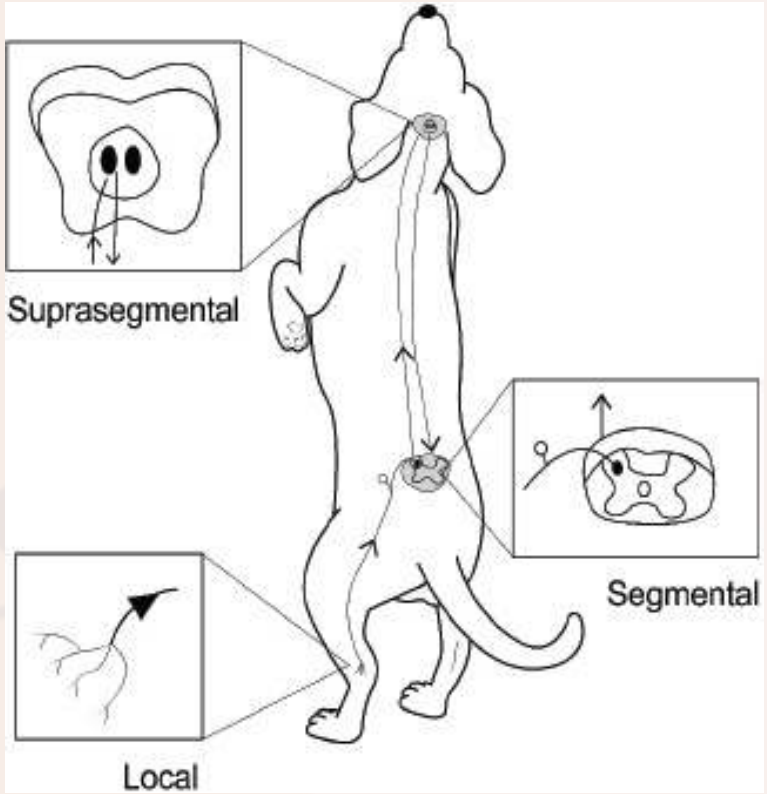

Figure 6.
Simplified block diagram illustrating the physiological interactions involved in needle stimulation to produce the beneficial responses to acupuncture.

– Kendall (1989)

– Dewey & Xie (2021)

局部效應
(Local effects)

位置 局部穴位

疼痛傳遞路徑階段 **導入 (Transduction)**

理論

- 西醫 — **微小創傷 (Microtrauma)**：製造一個很小的微創，就跟「組織受傷」會產生一樣的反應，創傷引起身體癒合
- 中醫 — **得氣 (De Qi)**：針刺穴位並刺激經絡時引起氣的流動，而感受到的反應

西方醫學視角的穴位

- 穴位對應於神經束、血管及結締組織等解剖結構
  (Nerve bundles, blood vessels, and connective tissue)

  - 豐富的游離神經末梢 (Free nerve endings)
  - 皮膚感受體 (Encapsulated cutaneous receptors)
  - 肌肉感覺受體 (Muscle spindles, Golgi tendon organs)
  - 傳入神經纖維 ex: A-delta fiber 和 C fiber (Afferent fibers)

局部效應
(Local effects)

西醫 微小創傷
(Microtrauma)

Inflammatory soup

Releases Hageman's Factor XII
Produces local PGs
Mast Cell degranulation
Releases Bradykinin

局部反應

- 局部免疫能力增強 (Local immune status ↑)
- 局部血流量增加 (Local blood flow ↑)
- 局部肌肉和組織的放鬆 (Local muscle & tissue relaxation ↑)

局部效應
(Local effects)

中醫

得氣
(De Qi)

治療效果與得氣反應 (De-Qi response) 密切相關
若未出現得氣反應，針灸治療的效果將會減弱

得氣反應

- 肌肉抽動 (Muscle twitching)
- 怒咬人 (Attempt to bite)
- 流鼻水 (Runny nose)

節段效應
(Segmental effects)

位置 脊髓

疼痛傳遞路徑階段

傳送 (Transmission)

調節 (Modulation)

理論 **門控理論** (Gate Theory)

- 針刺活化 Aβ、Aδ 纖維, 訊號傳遞至脊髓後角
- 活化抑制性中間神經元, 釋放腦啡肽 (Enkephalin)、強啡肽 (Dynorphin), 關閉痛覺閘門, 抑制 Aδ、C 纖維的痛覺訊號向上傳遞

中樞效應
(Central effects)

位置

大腦皮質
腦幹
視丘
下視丘

疼痛傳遞路徑階段

調節 (Modulation)

認知 (Perception)

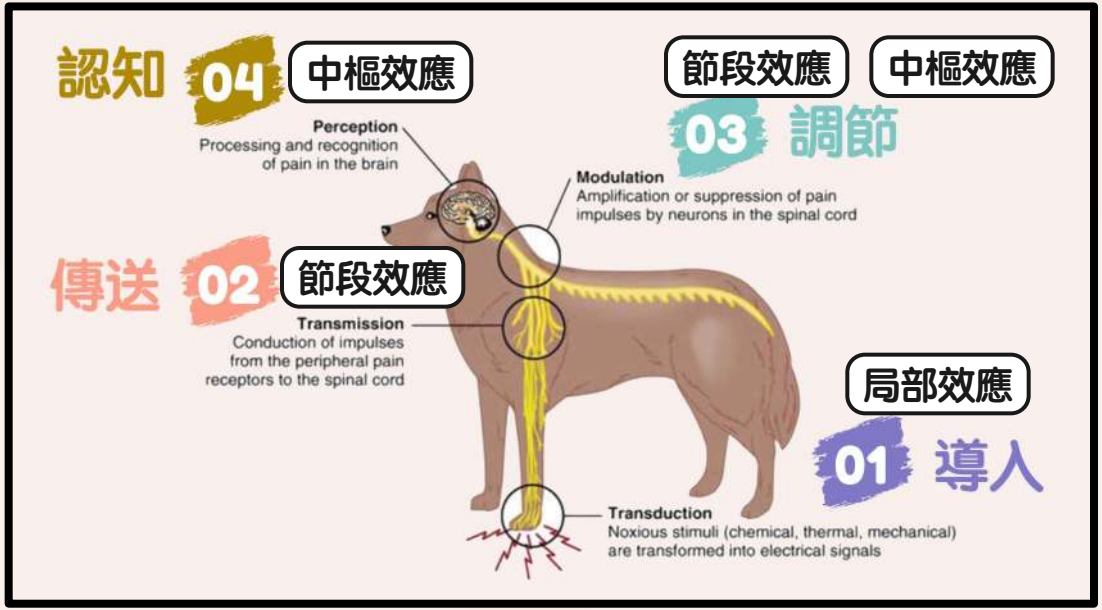

理論

激素理論 (Hormonal Theory)

- 針灸刺激可透過中樞神經系統調節下視丘-腦垂體-腺軸，促使多種激素分泌，進而影響疼痛、免疫、代謝和情緒
- 內啡肽 (β-Endorphins) 、血清素…

Work at where?

ALL !!!

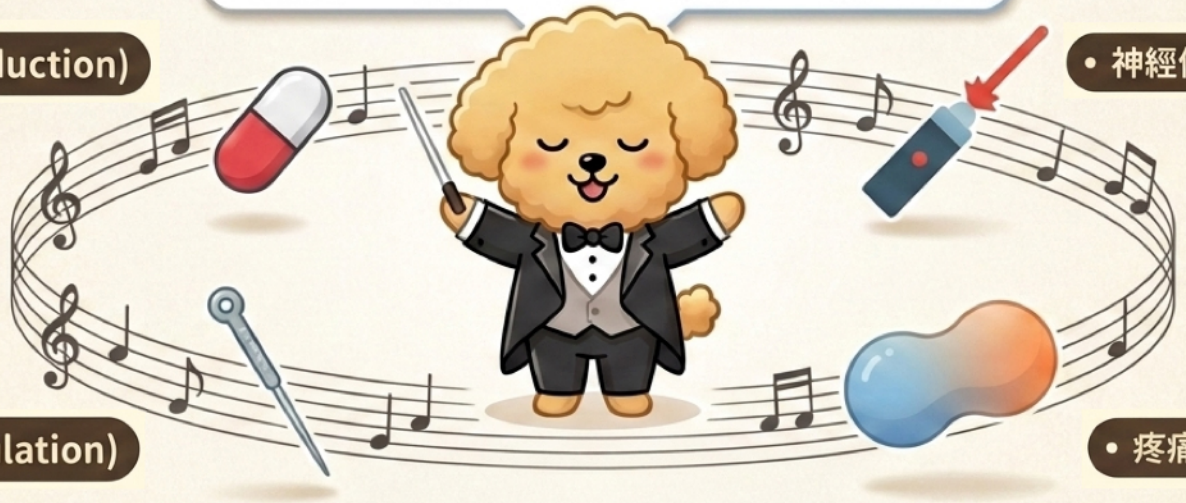

多模式治療計畫
(Multimodal Treatment Plan)

多模式治療計畫 (Multimodal Treatment Plan)

針對疼痛在神經系統的多條傳導路徑，進行全方位協同作戰

同時結合多種不同作用機制的治療方式（藥物 + 非藥物物理復健）。

- 訊號轉換 (Transduction)
- 神經傳導 (Transmission)
- 脊髓調控 (Modulation)
- 疼痛感知 (Perception)

多模式治療計畫 (Multimodal Treatment Plan)

儀器治療 (Therapeutic Modalities)

- 處方飼料 (Prescription Diet)
- 營養保健品 (Nutraceutical)

2026/08/23

為什麼需要多模式治療？

多點同步攔截，發揮協同療效

1+1 > 2，有效預防中樞敏感化。

分散治療風險，減少藥物副作用

降低單一藥物依賴，保護肝腎與腸胃道。

打破惡性循環，兼顧止痛與功能恢復

結合運動治療，真正恢復患肢活動力。

復健治療的資產配置：股票 vs. 債券

Librela、NSAIDs（股票）

見效快、高爆發力，但單一押注具潛在風險。

Class IV Laser（債券）

穩健修復、長期保本、降低整體不良反應風險

兩者搭配 = 穩定的治療資產配置

高低風險完美對沖

2022 AAHA Pain Management Guidelines for Dogs and Cats*

Margaret E. Gruen, DVM, MVPH, PhD, DACVB†,
B. Duncan X.Lascelles, BSc, BVSc, PhD, CertVA, DSAS(ST), DECVS, DACVS, FRCVS†,
Elizabeth Colleran, DVM, MS, DABVP (Feline), Alison Gottlieb, BS, CVT, VTS (ECC),
Jennifer Johnson, VMD, CVPP, Peter Lotsikas, DVM, DACVS-SA, DACVSMR,
Denis Marcellin-Little, DEDV, DACVS, DACVSMR, Bonnie Wright, DVM, DACVAA

ABSTRACT

These updated guidelines present a practical and logical approach to the assessment and management of acute and chronic pain in canine and feline patients. Recognizing pain is fundamental to successful treatment, and diagnostic guides and algorithms are included for assessment of both acute and chronic pain. Particularly for chronic pain, capturing owner evaluation is important, and pain-assessment instruments for pet owners are described. Expert consensus emphasizes proactive, preemptive pain management rather than a reactive, "damage control" approach. The guidelines discuss treatment opti centered on preemptive, multimodal analgesic therapies. There is an extensive variety of pharmacologic and nonph cologic therapeutic options for the management of acute and chronic pain in cats and dogs. The guidelines incl a tiered decision tree that prioritizes the use of the most efficacious therapeutic modalities for the treatment of acute and chronic pain. (*J Am Anim Hosp Assoc* 2022; 58:55–76. DOI 10.5326/JAAHA-MS-7292)

“ The pain transmission system is complex and has a lot of redundancy, so interrupting the pain pathways using **multiple differing approaches** is more effective clinically than relying on a single receptor or mechanism. ”

“ Chronic pain involves multiple and often complex changes in the sensory system. A combination of effective, known analgesics and nondrug therapies, combined with appropriate adjunctive therapies, is optimal. ”

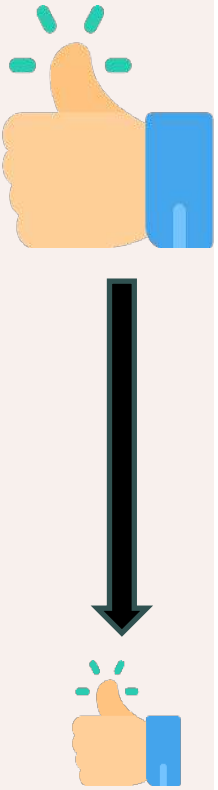

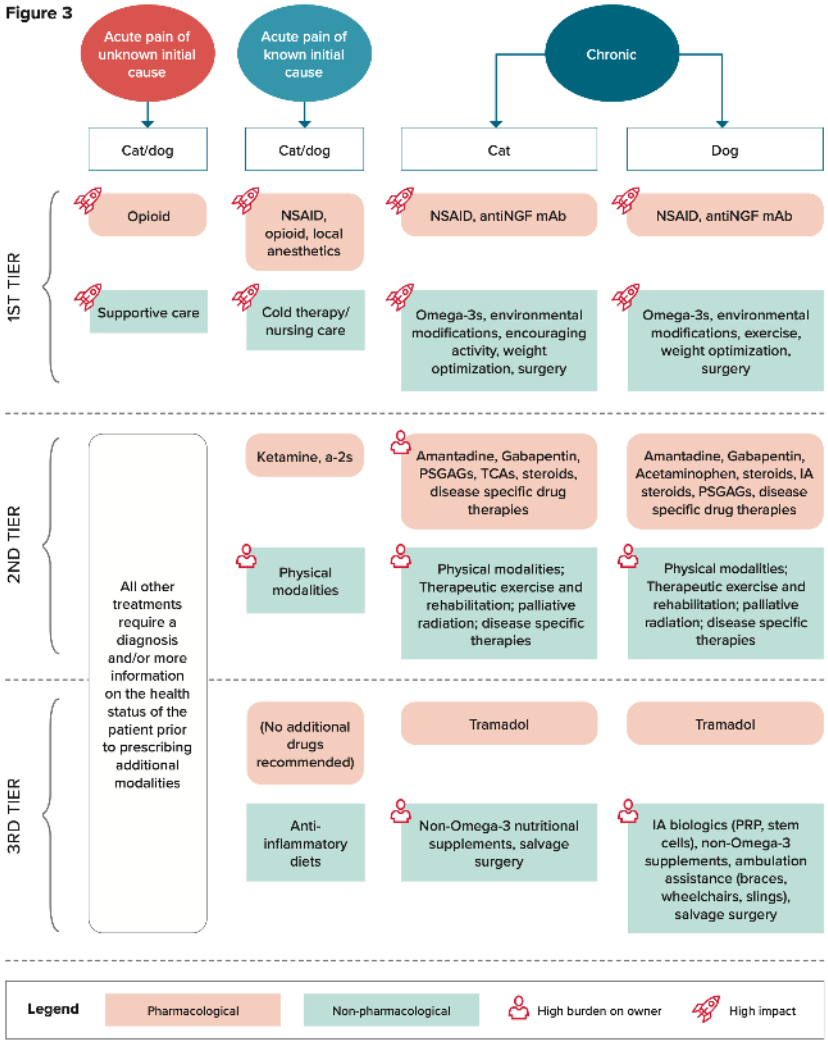

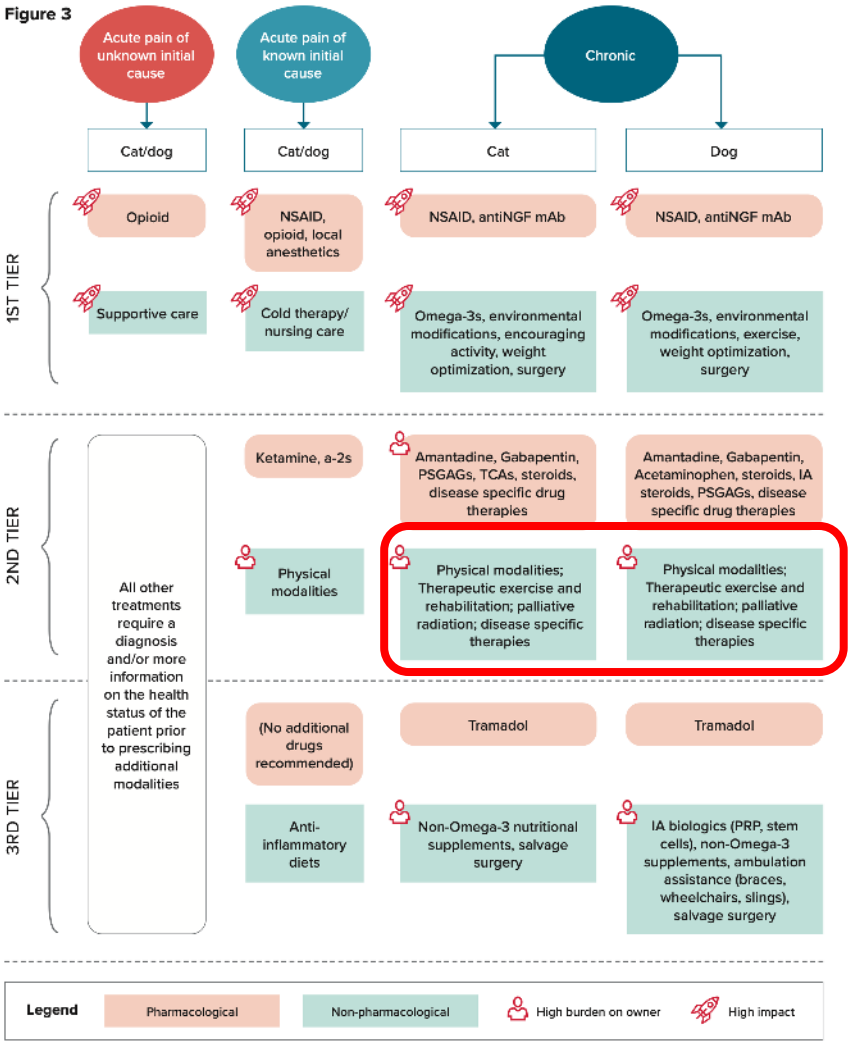

Figure 3

“ Tiers are presented from highest recommendation (most evidence-based for effectiveness) to lowest, although all therapies presented have some evidence to support their use. ”

Where is Acupuncture?

“ Physical modalities ”

Acupuncture

There is not an abundance of evidence-guided studies supporting the use of acupuncture. However, a 1997 National Institutes of Health Consensus Statement indicated promising results for the use of acupuncture in humans postoperatively, for treating chemotherapy nausea and vomiting, and in cases of postoperative dental pain. In the veterinary literature, acupuncture has been reported to be helpful as an adjunct treatment for postoperative pain following ovariohysterectomy in cats[130] and dogs and for managing intervertebral disc disease, but it was not found to be beneficial for the treatment of pain associated with OA in dogs.[131] Further work is needed to fully define the role of acupuncture in pain control.

Multimodal Pain Management !!!

針灸在復健醫學的臨床應用

02 - 針灸小撇步

1. 解剖學 (Anatomy)
2. 寸 (Cun) or 吋 (Inch)？

解剖學
(Anatomy)

but if I didn't know any better, I'd say he was trying to get rid of me.

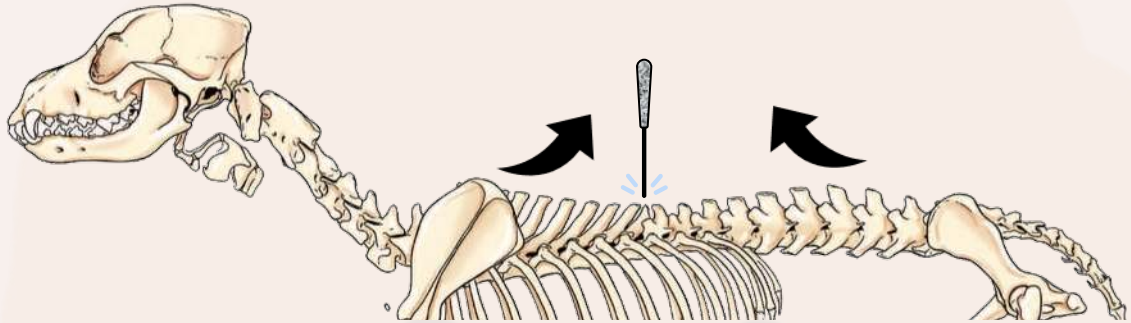

Tigress (悍嬌虎)

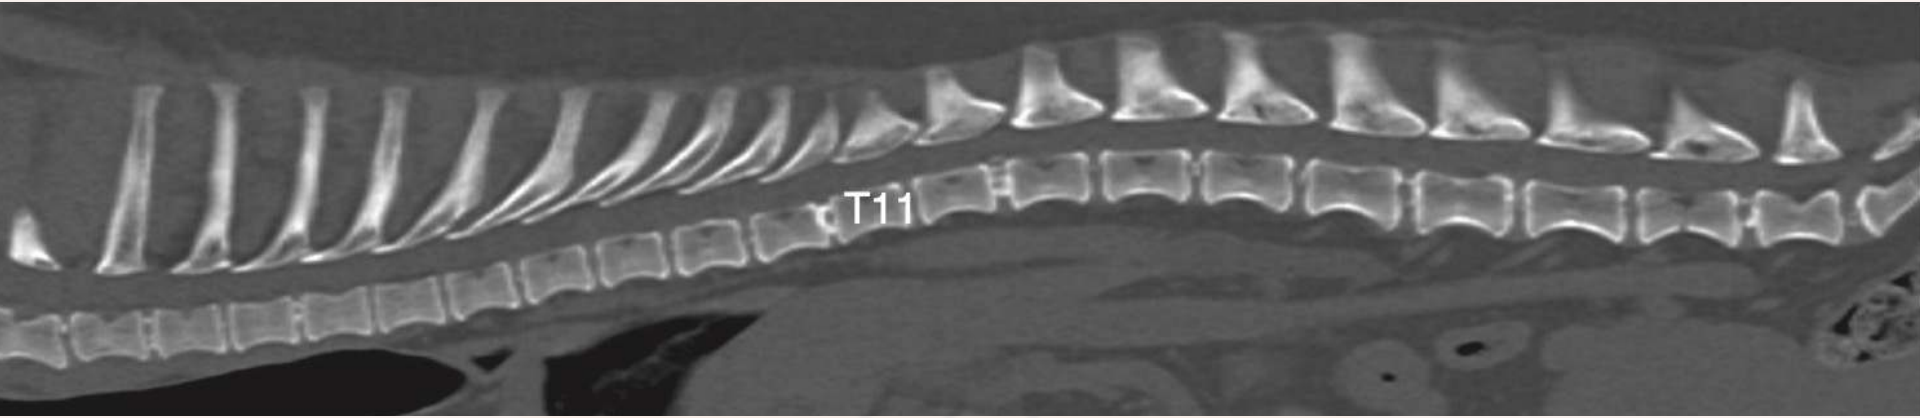

Po (阿波)

Most Important

Locate T10 & T11, Anticlinal vertebra (頂椎)

- The vertebra on which the spinous process is vertical.
  - T11 is the anticlinal vertebra in most dogs
  - T11 being the anticlinal vertebra most often in large dogs
  - T10 being the anticlinal vertebra most often in small dogs

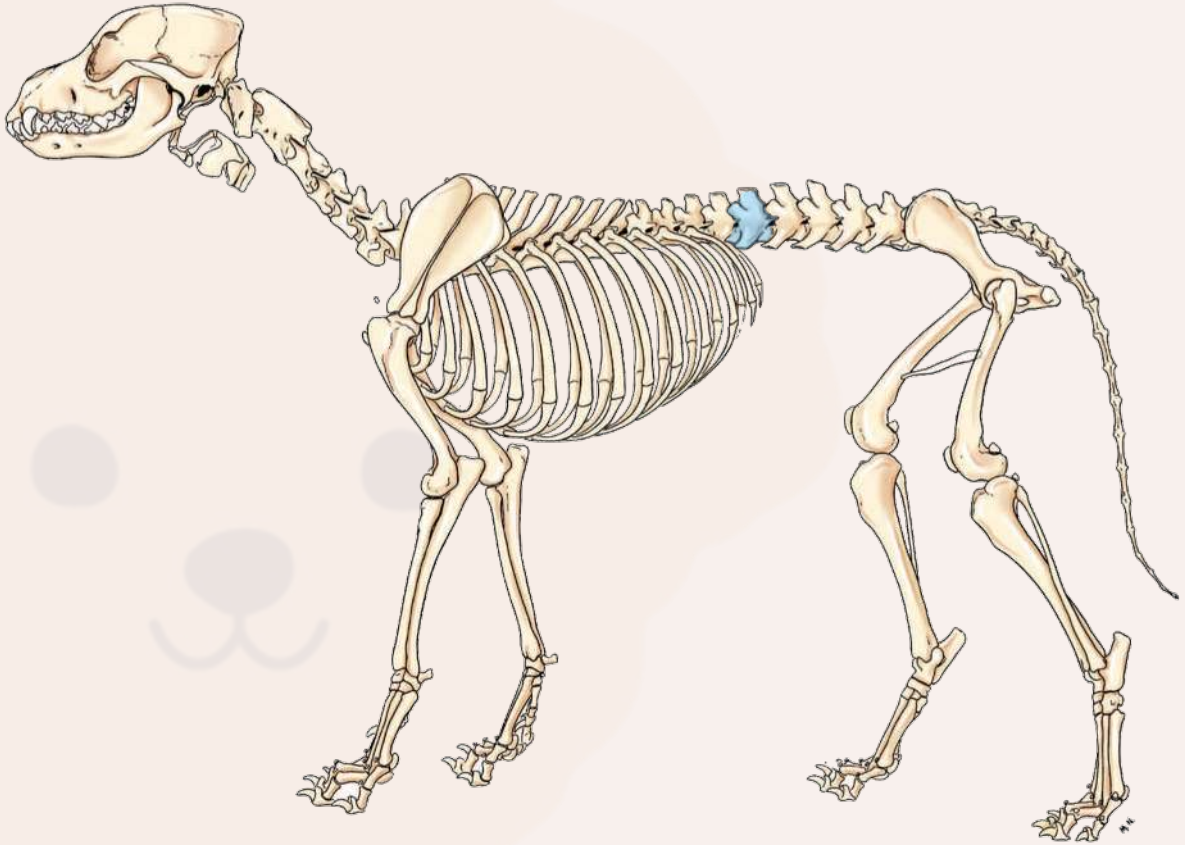

5 y/o Dachshund

Locate L2

往上對

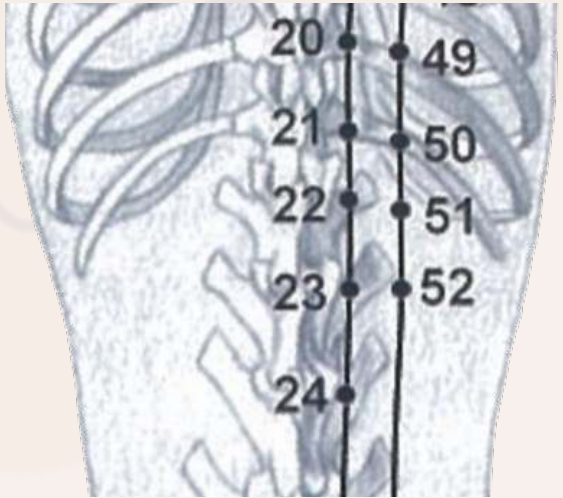

肋軟骨
(Costal cartilages)

BL-23 (腎俞) L2 棘突後緣旁開 1.5 寸

Location:

- **This point is located on the dorsolateral aspect of the spine, 1.5 Cun lateral to the caudal border of the dorsal spinous process of the second lumbar vertebra (L2).**

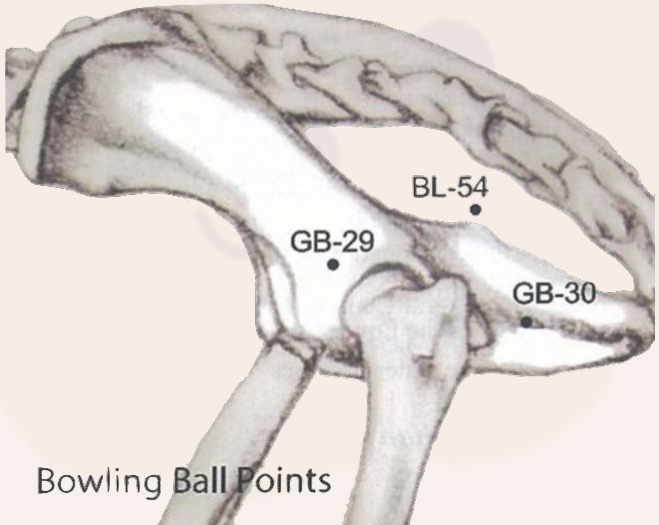

GB-30 (環跳)

股骨大轉節和坐骨粗隆的連線中點

Location:

- **This point is located in a depression midway between the greater trochanter of the femur and the ischiatic tuberosity.**

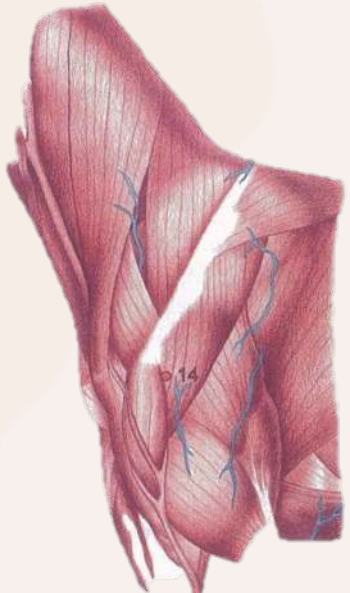

TH-14 (肩髃)

肩峰後下側，
位三角肌肩峰段的後側凹陷

Location:

- **This point is located at the level of the shoulder joint, caudodistal to the acromion on the caudal margin of the acromial head of the deltoideus muscle.**

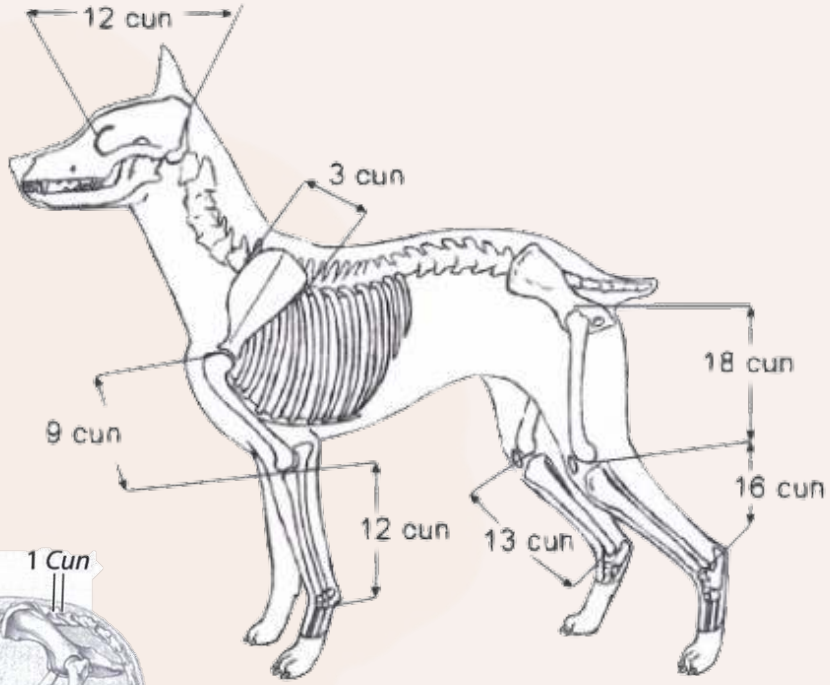

寸 (Cun) or 吋 (Inch) ?

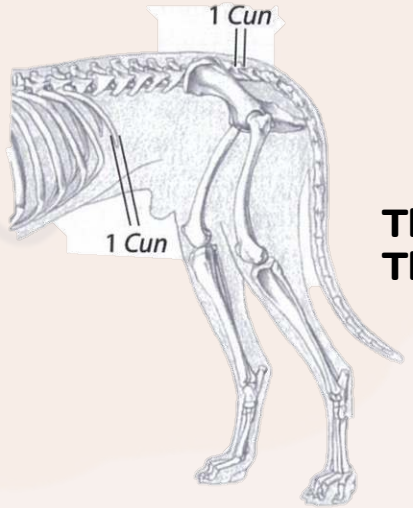

寸 (Cun) | 骨寸

- The Acupuncture Unit
- Measurement of the Body

吋 (Inch) | 英寸

- 1 inch = 2.54 cm

The length of the first tail = 1 Cun
The width of the last rib = 1 Cun

Q :小吉和大丹的前臂都是 12 寸 (Cun) 嗎?

針灸在復健醫學的臨床應用

03 - 針灸技術

1. 乾針 (Dry needling)
2. 電針 (Electroacupuncture)
3. 水針 (Aquapuncture)
4. 艾灸 (Moxibustion)
5. 雷射針灸 (LASER Acupuncture)
6. 穴位植入物 (Acupoint implantation)

乾針
(Dry needling)

“ 乾針” 是最常用 (Most Common) 的針灸形式

意義

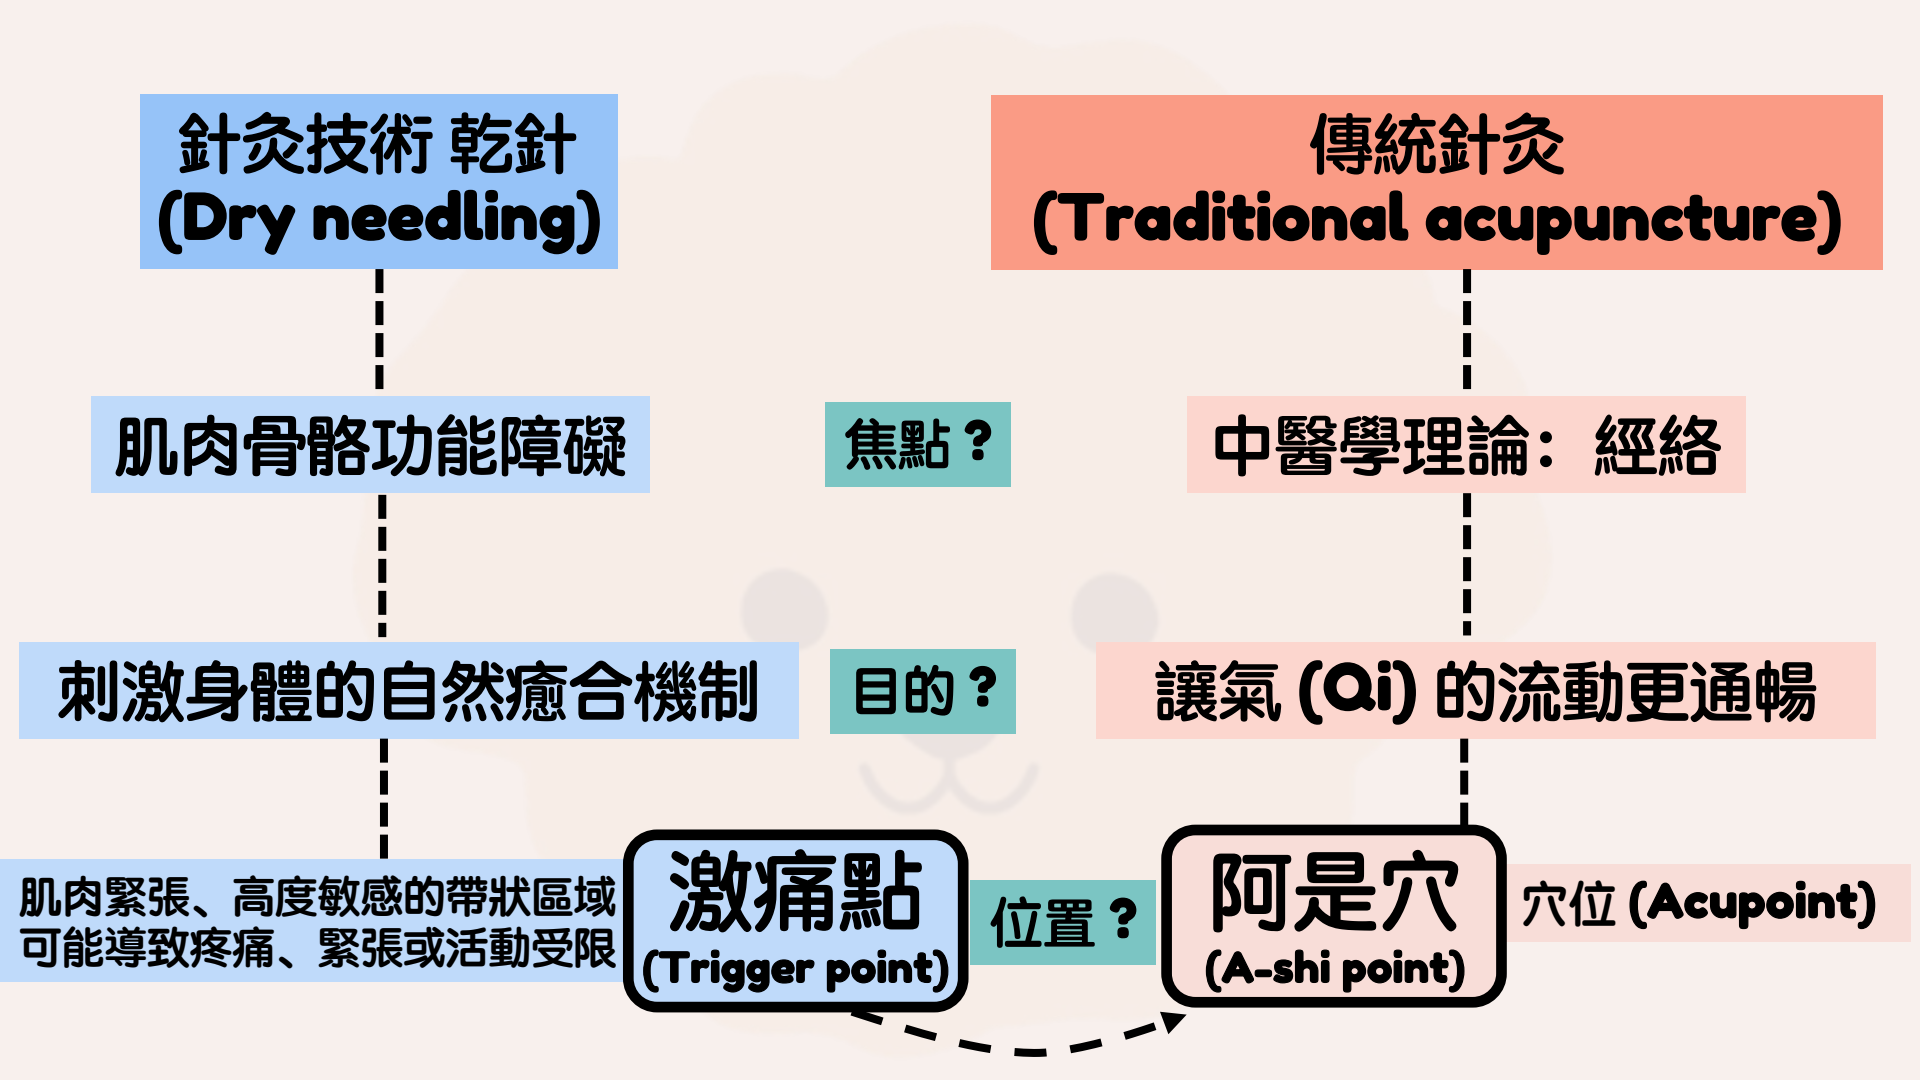

將細針插入特定的穴位，從而刺激身體的自然癒合機制

效果

1. 促進血液循環 = 消炎 (Promotes circulation)
2. 疼痛緩解 (Reduces pain)
3. 恢復平衡 (Restores balance)

應用

- 傳統針灸 (Traditional acupuncture) : 經絡、中醫理論
- 針灸技術 乾針 (Dry needling) : 針對 激痛點 (Trigger point)

針灸技術 乾針
(Dry needling)
傳統針灸
(Traditional acupuncture)
肌肉骨骼功能障礙
焦點？
中醫學理論：經絡
刺激身體的自然癒合機制
目的？
讓氣 (Qi) 的流動更通暢
肌肉緊張、高度敏感的帶狀區域
可能導致疼痛、緊張或活動受限
激痛點
(Trigger point)
位置？
阿是穴
(A-shi point)
穴位 (Acupoint)

Insertion Methods
(進針法)

- 單手進針法 → 飛針 (Flying Needle)
- 雙手進針法
  - 切指進針法 (Thumbling)
  - 挾持進針法 (Holding)
  - 提捏進針法 (Pinching)
  - 舒張進針法 (Stretching)

切指進針法 (Thumbling)

舒張進針法 (Stretching)

挾持進針法 (Holding)

提捏進針法
(Pinching)

電針
(Electroacupuncture)

“ 電針” 是現代化 (Modern adaptation) 改良方法

意義

- 傳統乾針的基礎上引入電刺激
- 將溫和的電流 (Electrical currents) 接上已入針的針灸針

效果與應用

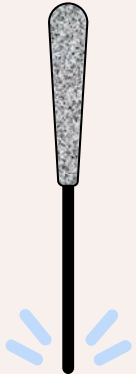

電針有更強的

鎮痛效果
(Analgesic effect)

肌肉骨骼疾病
(Musculoskeletal) ex: Arthritis

神經再生
(Nerve regeneration)

神經性疾病
(Neurological) ex: IVDD

電針的優點

- 更強更持久的療效 → 更少療程、更少穴位
- 提供持續且可調節的刺激，節省手動的針刺手法 (提插；捻轉)。
  傳統上，應每 2 ~ 3 分鐘進行一次手法刺激
- 精確控制三大參數
  - 頻率 (Frequency)
  - 強度 (Amplitude)
  - 時間 (Duration)

JM-2A 电针仪
Electro-Acupuncture Stimulator
Veterinary use only
Jing Mei
Power
INTENSITY
1
2
3
4
INTENSITY
5
6
7
FREQUENCY
F1
F2
FREQUENCY
F1
F2
ON
OFF
0 10 20 30 (min)

01 頻率 (Frequency)

- 低頻 (20 ~ 30 Hz) → Endorphin release → Pain condition
- 高頻 (80 ~ 120 Hz) → Serotonin release → Internal medical condition

	Indication	F1	F2
間斷波 (Intermittent wave)	Muscle atrophy	0	20~30
疏密波 (Dense and Disperse wave)	Internal medicine Nerve paralysis	80	120
連續波 (Continuing wave)	Pain condition	20~30	0

02 強度 (Amplitude)

- 逐漸調高至動物可以耐受的強度
- Needle twitching !!

03 時間 (Duration)

- 10 ~ 30 min

電針禁忌症 (Contraindications)

- Seizure animals
- Extremely nervous or exhausted animals
- The wire should NOT be connected
  - Abdominal areas for pregnant moms
  - Through the chest if the patient has a pacemaker
  - Through the tumor mass

水針
(Aquapuncture)

“ 水針” 是現代化 (Modern adaptation) 改良方法

意義

- 將無菌液體或可溶性物質注射到穴位
- 結合傳統「乾針」 & 現代「藥物」的方法

效果與應用

雙重刺激

物理刺激 (Physical stimulation)

注射液體在組織中產生壓力
造成更持久的刺激，以延長治療效果

化學刺激 (Chemical stimulation)

根據所選擇的注射物質
提供額外的療效

注射物質

- 生理食鹽水
- 患者自己的血液
- 蜂毒療法 (Apitherapy)
- 維他命 B12
- 草藥萃取物

用於治療 IVDD

水針的優點

- 焦慮、緊張、難以長時間留針進行乾針的動物…
  使用水針可快速完成，且提供持久刺激
- 延長並增強治療的效果
- 安全性高

艾灸
(Moxibustion)

艾草
(Artemisia vulgaris)

“ Moxibustion is a method by which moxa (艾草) or other herbs are burned on or above the skin near acupuncture points. ”

“ The heat and herbal essence warms the Qi and blood in the channels and collaterals and thus increases the flow during times of stasis. ”

“ Moxibustion also invigorates the Yang Qi (陽氣) and dispels internal cold and dampness as well as eliminates some forms of local heat toxin. ”

Moxibustion
(艾灸)

Indirect moxibustion therapy

1. Needle moxa = Warming needle (針灸)

2. Moxa stick therapy (艾條灸)

針灸在復健醫學的臨床應用

04 - 文獻回顧
